Board Spacer Kit

Installation Note

Gallagher Board Spacer Kit: C200450

1 Introduction

The Gallagher Board Spacer Kit provides the ability to stack Gallagher HBUS 16 In and 16 Out Boards (C300688) one on top of the other within a Gallagher Cabinet.

Note: GBUS is not supported from version vEL9.10 of Command Centre.

2 Shipment Contents

Check the shipment contains the following items:

- 9 x Gallagher Board Spacers
- 1 x Self-adhesive label

3 Double Stacking Gallagher HBUS 16 In and 16 Out Boards

To double stack Gallagher HBUS 16 In and 16 Out Boards, perform the following procedure:

1. Install and wire the bottom board into the cabinet, using the supplied board spacers, to screw the board into the Cabinet.

Hint: Fix the second half of the board's component identification decal inside the cabinet door. This half of the decal enables you to enter wiring and connection details for the bottom board.

2. Install and wire the **top** board into the cabinet, using the screws supplied with the cabinet.

Hint: Fix the second half of the board's component identification decal inside the cabinet door. This half of the decal enables you to enter wiring and connection details for the top board.

3. Configure the boards in Command Centre. Refer to the topic "*Configuring an HBUS IO Interface*" in the Command Centre Configuration Client Online Help.

Click the **Status and Overrides** tab and check the **Disable Front Tamper** checkbox for the bottom board.

Click the **Status and Overrides** tab and check the **Disable Rear Tamper** checkbox for the top board. Align the bottom left corner of the label with the centre mounting hole on the PCB.

Note: The label does not have to be positioned exactly as shown. However, it must cover the reverse side of the light green coloured Infrared LED, allowing 1.5 cm between the LED and the edge of the label, otherwise tamper alarms may still occur.
