Everything you need

Gallagher's Starter Kit is everything you need to ensure cost effective alarm management and access control for your business.

What is in the kit?

The Starter Kit is a complete package to get a small site up and running with integrated access and alarms management. Two kit variants are available: Standard or with an additional PSTN Dialer.

Starter Kit Cabinet

Controller 6000 Starter Kit Variant

HBUS 8in Board

T20 Alarms Terminal

2x T15 Reader Multi-Tech Reader Black

3.5A Power Supply

HBUS 8in 4out Board

Fuse and Fire Relay Board

Future Scalability

If your site grows, so can your security, which is easily expanded from the Starter Kits initial configuration.

Control Unit

Alarm Management Terminal

Controlled Door
Access Point

A Complete Solution

All the components come pre-fitted, to speed up installation time, and eliminate the chance of delays due to missing components. The Starter Kit Cabinet holds all the specialized equipment responsible for the comprehensive control of the system and once installed operates efficiently on its own.

Alarm Management

The T20 Alarm Terminal is a robust vandal resistant alarm management device, suitable for interior or exterior use, allowing:

- Arming and disarming of alarms
- Dynamic display of alarm status
- Configuration of a Mimic Panel which reflects the status of the site's alarms.

The Starter Kit also allows alarms to be monitored by external alarm monitoring providers.

Access Control

Up to two controlled doors are catered for in the Starter Kit. This allows doors to be accessed via entry card or mobile phone and Gallagher's Command Centre software to provide a robust and reliable access solution.

The real benefits of access control comes from the ability to:

- Enjoy the simplicity of keyless entry and exit
- View comprehensive information on who accessed where, when
- Remotely control access to a site.

How does it work?

The Gallagher Starter Kit has been designed for sites with minimal controlled doors and alarm management needs, but still require reliable and effective security. Once installed the central controller connects with the door access hardware and sensors to provide a self contained service, monitoring and controlling access and alarms from around the site.

Value

The Starter Kit provides an affordable access and alarm solution with the quality assurance of the Gallagher brand to ensure the best solution is provided at the best price.

Confidence

With more than 75 years of experience, Gallagher are proud to be servicing customers in more than 120 countries.

Installed by certified technicians, our products are manufactured and tested to meet the highest international safety standards. Award-winning innovation means you have access to the highest quality security solutions available.

Flexibility

Gallagher security solutions are designed to meet your specific needs, with the Starter Kit as the initial solution, the scalable nature of our technology means that we can adapt to your future site requirements.
